Foma is everywhere!

FALCIOĞLU was founded in 1975. To manufacture "Healthy Taps", it proved hardwork with "technology" and aimed the "high and sustainable quality". As a result FOMA gained a name on the local market and were well known worldwide as well.

In 2004 the investing of "Low Pressure Die Casting Technolgy" FOMA added to the factory the plants of IMR Italy. To gain the "Healty Tap" name, CC757S and CC773S brass material is consumed by diecasting: chemical composition max. 0,99% Pb (Lead) in conformity with the EU Drinking Water Directive.

By diecasting and assembling both, FOMA follows the ISO 9001:2008 cares the EN under inspection of TSE (Turkish Standardisation Institute) and every single item is tested and checked one by one before reaches the final consumer in order to gain the "high and sustainable quality".

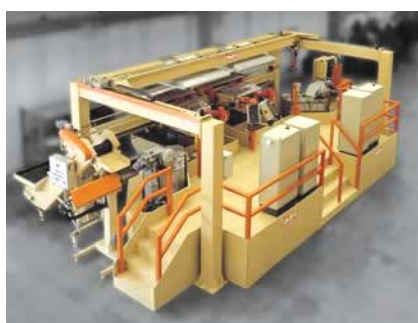

To work to reach to the perfect customer satisfaction is the essential part of the mission of FOMA, to reach the aim to be a "Trustworthy Brand Name".

Foma technology

In 2004 we added the "Low Pressure Die Casting Technology" to our factory by investing to the plants of IMR Italy. So we were able to reduce the Pb composition by our products below 1% and started to produce "Healty Taps, Faucets & Mixers".

Low Pressure Die Casting Technology

**NA
NO**
TECHNOLOGY

Today, we are proud to introduce our new product line ZERON with "0" Pb and within the category of "Lead Free".

Also we are proud again to introduce the NA-NO painted VISTA line, which provides clean, hygienic and long lasting plating in various colors and surface.

ZERON

Why your Taps,
Faucets & Mixers
must be healthy?

Key features which must be available in one Healty Tap:

Perfect working cartridges

500.000 on-off cycles tested cartridges

Shining chrome plating

Chrome plating thickness: Cr \geq 0.12 micron, Ni \geq 5 micron
(min. 200 hours abration resistant against salty water mist at 55% relative humidity and 35° temperature)

Excellent flow channelles

Flow channelles in accordance with EN ISO 3822

Superior quality aerators

Water saving and non polluting superior quality aerators

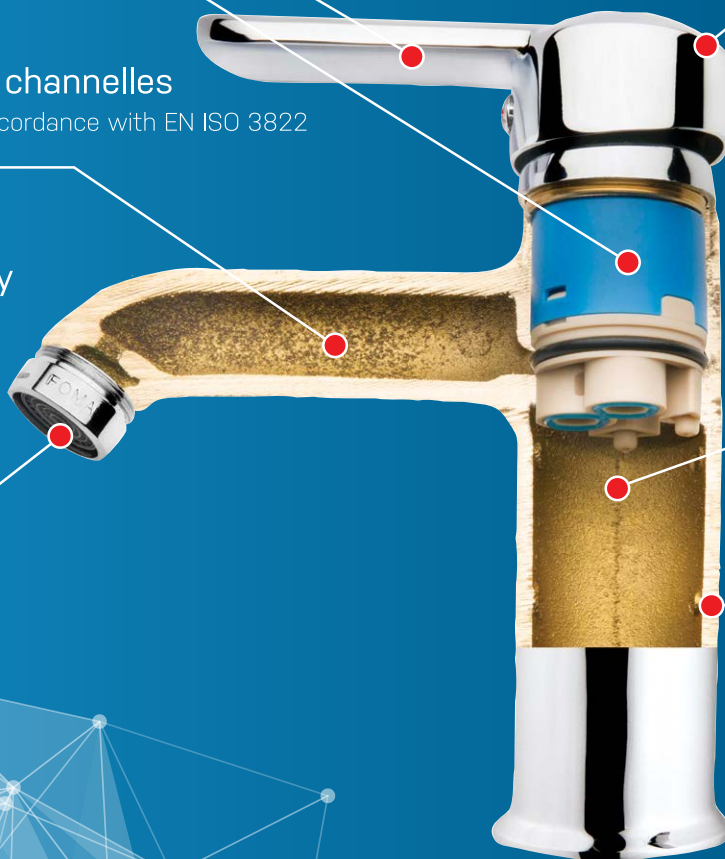

Healthy brass material

Material health = Human health

CC757S brass material in accordance with DIN 50930-6 with the chemical composition max. 1% lead (Pb) to provide "non polluted drinking water"

Best wall thickness

Wall thickness: min. 3,2 mm at any section

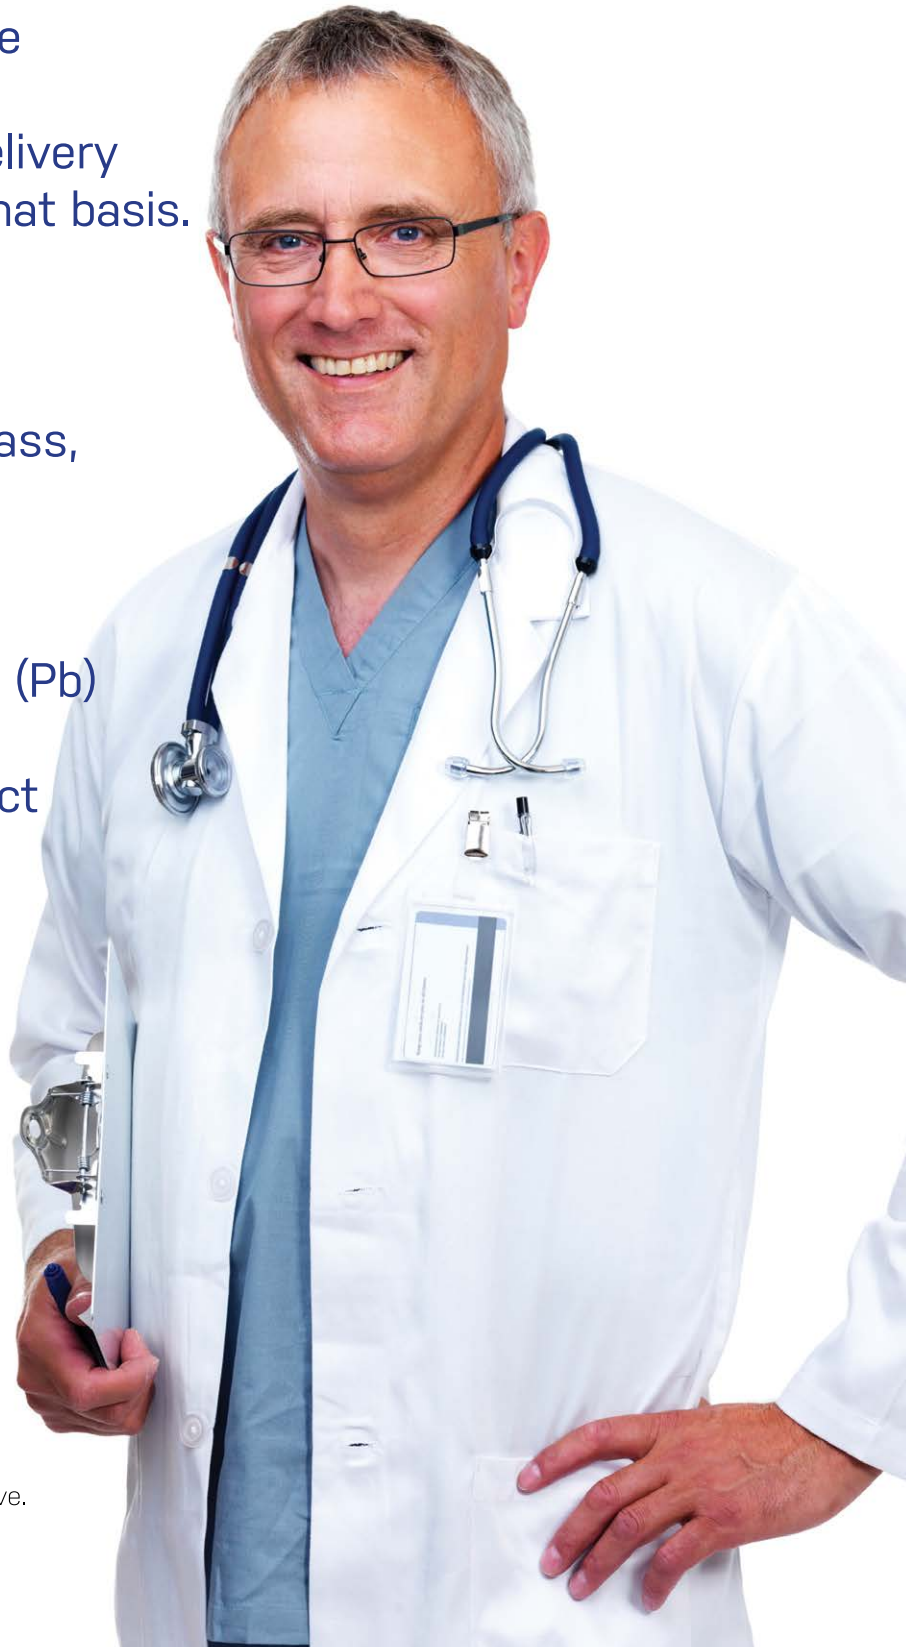

With FOMA Taps, Faucets & Mixers you and your loved ones are in comfort

FOMA considers your health...
Starting from assigning the
specific raw material until
the final packing before delivery
we never step back from that basis.

FOMA constitutes as
raw material specific
composition of CC757S brass,
which contains less than
1% lead (Pb)*

Do you know that the lead (Pb)
proportion in your taps,
faucets & mixers may affect
your health?

*FOMA is consuming CC757S brass material
in accordance with DIN 50930-6 with
the chemical composition max. 1% lead (Pb)
in conformity with the EU Drinking Water Directive.

This product is "lead free"
Lead is harmful to health.

ZERON

By our 45th year we exporting our "lead free"
taps & mixers worldwide
